**Type of organisation:**

SME     School     University     Public Authority   
 Training     No Profit     NGO   
 Other (Specify)

**Fields of action:**

SMEs     Youth     Universities     Public Authorities   
 Equal opportunities     Schools     Unemployed   
 Other (Specify)

**Description of the organisation**

UPV/EHU is the Public University of the autonomous community of the Basque Country. In the university there are 45000 students, 5400 teachers and researchers. The university is offering 70 degrees, 100 master courses. The university is sited in three campuses around the three capital cities of the Basque community. See: <https://vimeo.com/138845766>

**Experience of the organization in previous European projects**

The organization, have a lot of experience on several European projects. If we put the focus on the research group involved in this project, we have been involved until December in a huge Erasmus + project with more than 70 partners: HOPE.

On the other hand, our research group have research projects with several universities across European (KU Leuven, Dublin City University, Udine University ...) and in America (Washington University, Universidad de Monterrey,...).

**Experience and Expertise of the organization in the project's subject area**

The organization is involved in a methodological development: IKD program. Through this program, the university is pushing their teachers to use more and more active learning methodologies. With that purpose there is also a formation program for teachers: ERAGIN.

ERAGIN program was designed by Jenaro Guisasola who is the leader of group participating in this project.

**Contributions that can be provided to the project**

We would like to share the experience, materials and research that our group developed in teacher training

**Reasons of involvement in the project**

The interest to know how students develop their learning with active learning methodologies. We would like to share our point of view and our known in this area and we would like to learn from other partners.

**Contact Person's Experience and Expertise**

Contact person is part of the group that led the methodological innovation in the University of the Basque Country. She is doctor in Physics Education and She is teaching Introductory Physics for engineers and Electricity in the master of secondary school teaches.

She is involved in several (national and international research) research programs.

She is also active in university teachers' training into ERAGIN program.
